## HOW TO CONDUCT A SESSION WITH YOUR PROFESSIONAL BIOCLEANSSE UNIT

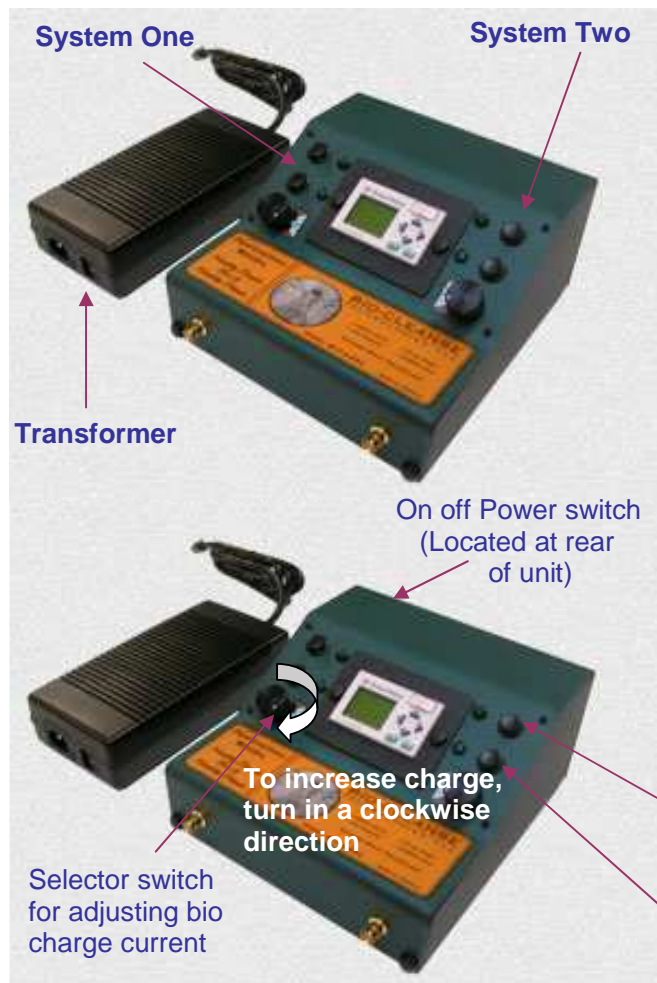

Suggested Bio Cleanse Session: 20mins Bio-Charge and 10 minutes Schumann Wave for a start (you can change this mid cycle if you wish).

Running a session: Set up first – Fill the footbath to just under the top plastic ring of the water module with very warm water, **this opens the pores in your feet**. Prepare a bucket of water to wash your feet in for the end of the session, quarter full is OK.

- Unit on the on/off switch located at the back of unit (the unit should sound like an air conditioner (see below pictures of unit).

### Note:

*Check the water module before use. Make sure that the S clip is not touching any other ring. It should be on top of ring 2 and under ring 6 (Sometimes it gets jammed against the top ring, see diagram enclosed with unit).*

### System One: (Left hand side of unit)

- Press the lower button to select system one
- Set the time as per instructions (maximum 30 minutes).
- Hold down the lower button for two seconds to activate.
- Turn selector switch to full, turn clockwise.
- Add salt slowly (one small pinch at a time) and wait for reaction.
- Attempt to set it at about 1.7 (it may move up later).
- If the gauge goes over 2.00 quickly turn selector switch to neutral, this will lower the output. (The unit will switch itself off after 2 minutes at this level). If a fuse blows because the gauge goes over 2.5, replace the blown fuse at the back of the unit with a 3-amp fast or ordinary blow fuse.
- After 20 minutes press top button to activate Schumann wave (optional).

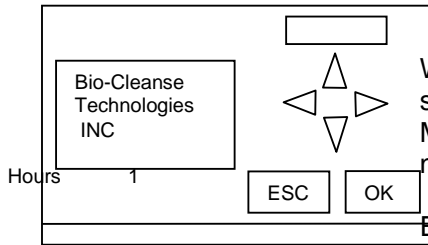

Top button used to select between Bio Charge & Schuman Wave (push once).

Bottom button used to select between unit 1 & 2. Hold down button for 2 secs to activate system.

**Repeat instructions for system two on the right side of unit. When the unit switches off it will not buzz...the lights go out. If you're working in a clinic situation you may need a timer.**

**READING THE DISPLAY:**

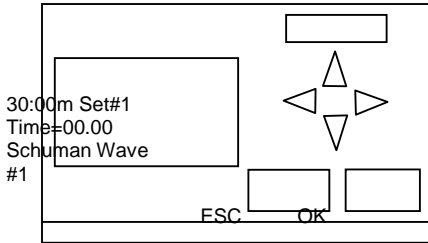

**Hour Meter**

When you first turn on the Bio Cleanse System you will see a screen that shows the company name and also the Hour Meter. This will show the number of hours of operation since new.

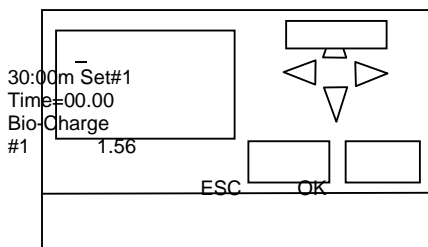

Every System when new will show 1 hour to start.

**Screen for System 1 – Schuman Wave**

- The Schuman Wave when selected will show the time but not the Bio Charge setting.
- This must be set prior to the Schuman Wave being selected.
- First set the system while in the Bio Charge Screen – then press the top button on System one to activate the Schuman wave for System one.

**Setting the Time**

- Press ESC to turn on the back light for the screen.
- Hold down on the ESC button for 2 seconds. See the indicator under the “30.00”.
- Press OK Button once. And the number will flash on and off.
- Use up and down arrows to adjust time.
- Use left and right arrows to select different number to adjust such as to set the time to 21.00 minutes.
- Press OK when you have set the time you desire.
- Press ESC to exit the time setting mode.

**SUGGESTIONS:**

**Basins:** Try a basin that's 13 inches square 6 – 7 inches deep. If you have someone with extraordinarily large feet then you may need to keep a spare footbath...but the small one is easy to manage...not so heavy when full of water ...this makes the job so much more palatable!

**Cleaning:** Wash water module under cold running water.

Every 20 sessions or so, as the rings get stained. Soak the water module in a bucket of warm water (up to the top plastic ring) with 2 tablespoons of CLR (Calcium, Lime, Rust) available from the supermarket \$9.95.

**TROUBLE SHOOTING:**

If the unit dose not operate or keeps fusing: 1<sup>st</sup> check the water module. Check the position of the S clip 2 & 6 or the copper E clip at the back 1,3,5,7. Sometimes the copper E clip disintegrates. Check all connections.

*Limited four-year warranty on Bio-Cleanse® Technologies products and, parts including but not limited to power supply control unit, excluding normal wear and tear, misuse or tampering. Accessory parts, excluding water module, are covered under warranty. Water module is under warranty for 90 days, excluding replaceable rings and clip.
